

Hands-On NFPA® 1033 Demonstrating Compliance on the Job Performance Requirements for Fire Investigators

**This training opportunity involves hands-on practical skills to provide the opportunity to demonstrate compliance with the job performance requirements as described in the NFPA® Standard:
Professional Qualifications for Fire Investigator.**

To maximize the learning experience, and to gauge the outcome of the candidate, we will cover appropriate material for each of the JPR's, requisite skills, and measurable outcomes for each of the job performance requirements.

As a group we will cover the appropriate material for each of the JPR's, and their appropriate sub-sections. After each JPR is covered, explained, and understood, you will then be allowed to perform the various JPR tasks, given the appropriate tools, and this will allow for the measuring of the observable outcomes. The grading will be listed as pass or fail.

Each attendee/candidate will be photographed conducting each of the JPR's and their appropriate sub-sections. Each attendee/candidate will be provided with a copy of the images demonstrating compliance with the JPR's after they are backed up on appropriate storage media, and servers, this will allow the ability to recover the lost documentation if the attendee would lose their copy.

Each attendee/candidate should bring appropriate clothing. Carterson Public Safety Group, Inc. will provide the cameras or capturing documentation, evidence collection kits, tools, diagramming materials, evidence containers, nitrile gloves, evidence tape, and other appropriate items to be successful in the hands-on portions of the class.

Instructor: Steve Riggs

Steve retired after twenty-two years of Law Enforcement, and Fire Service Experience in Oklahoma. Steve has been examining fire scenes for 40 years. Steve possesses a bachelor's degree in Emergency Services Management, Steve has extensive training in Fire Cause Determination, Criminal Investigation, Arson Investigation, Evidence Processing, Interviewing Techniques, and Case Management. He is a certified Police and Fire Instructor, and a Certified Fire Investigator Instructor.

Steve has successfully been involved in many Fire/Arson Prosecutions in Oklahoma and was involved in a Federal Prosecution. Steve has taught nationally for over twenty-two years throughout the United States.

Steve never lost an arson case in the public sector. Steve has authored and co-authored several fire training manuals and written "A Critical Analysis of NFPA 921 User's Manual 2nd Edition.
